Antique Effect Mirror Tile Range

Plain Mirror Tile Colours

Fitting

We recommend using Arbo Mirror adhesive which can be purchased alongside your Mirror tiles through our web site.

Please also refer to our Fitting guidance notes below which are also available to download from our web site.

If you would prefer to have a single piece of Antique effect mirror we can cut to size, add cut outs and bevel.

Get in touch with us for a quotation.

Preparation & Installation Advice

1. What you'll need

Tiles, tape measure, spirit level, safety gloves, safety glasses, recommended Mirror Adhesive and sealant gun. If you do not use our mirror adhesive, please ensure it clearly states MIRROR ADHESIVE on the tube and follow their instructions for application.

DO NOT USE SILICONE OR OTHER SOLVENT ADHESIVES

2. Measure

Measure the area to be tiled and work out how many tiles you need.

3. Prepare the Surface

Make sure the area to be tiled is clean, dry and flat.

4. Before you start

We recommend you start from the bottom and work up. Ideally having a fixed edge to work from like a skirting board or a temporary fixed edge batten that will help with slippage of the tiles whilst the adhesive goes off.

You may want to secure your first bottom row of tiles on day 1 and wait for the adhesive to fully cure and adhere to the wall before you start on the above rows.

5. Applying the adhesive

Keep the adhesive at least 50mm from the edge of the tile.

The adhesive will not set immediately on contact with the surface. You will be able to manoeuvre the tile into place after the tile has made contact with the surface. Apply the tile to the wall with good, even pressure and with a slight twisting action.

Once the mirror tile is in the correct position, we recommend you hold the tile for 2 minutes after which it will be safe to let go and secure with a temporary fixing like tape. The adhesive will take 24 hours to fully cure in ambient conditions.

Use a spirit level to ensure your tiles are fitted "square" both horizontally and vertically.

Leave a 1mm gap between each tile. You can use plastic spacers/packers which can be removed when the adhesive has cured. This will allow for manufacturing tolerances in the tiles and ensure you have neat joins.

6. How much Adhesive do I need

Our recommended Mirror adhesive is available from our on-line shop. We recommend 1 tube per 12 tiles.
